

Single Spray Simplicity

The Unist Coolubricator JR™ offers compact, portable lubrication for applications where a single nozzle can provide adequate lubrication and manual on/off control is desired. A magnetic mounting base on both the unit and nozzle allows you to move the Coolubricator JR™ between separate machines or applications. The Coolubricator JR's™ compact size allows it to fit where other lubricators can't.

Magnetic base makes mounting quick & easy!

- Fluid adjustment
- Air adjustment
- Built-in manual on/off valve
- Portable, 5' [1.5 m] hose, 12" [304.8 mm] plastic nozzle
- Reliable, .03 cc/stroke Unist pump
- Proven, 100 million cycle pulse generator
- Tough, vented 16 oz [473.2 mL] reservoir
- Heavy-duty magnetic base

Coolubricator JR™ & Coolube® Benefits

- Improve tool life
- Less housekeeping
- Increase chip recycling value
- Increase production speed
- No employee health concerns
- No coolant treatment or disposal
- No fluid oxidation (stickiness)
- No thermal shock with carbide tools

Portable | Fast setup | Compact | Save \$

Coolube® 2210 & 2210EP are USDA certified biobased products

Use your Coolubricator JR™ with Unist's high-quality Coolube® lubricant for an environmentally-friendly solution and a lifetime warranty on your unit's pump!
